The project helps strengthen internal and external capacities.

Learning

Competencies

Autonomy

The project aims to achieve positive effects that will be ongoing once the intervention is over.

Continuity

Resilience

Anticipation

The project aims to achieve positive short-, medium- and/or long term change for the targeted groups.

Strategy

Flexibility

Optimisation

The project meets demonstrated priorities and adapts to the intervention setting.

Mandate

Needs

Context

The project has the appropriate management capacity.

Organisation

Control

Communication

The project makes optimal use of resources.

Feasibility

Consistency

Product/Service

The project successfully achieves its objective.

The project is able to account for its actions to all stakeholders.

Compliance

Information

Availability

The project respects universal ethical principles and applies Handicap International’s values.

Values

Do no harm

Non-discrimination

The project has put specific mechanisms in place to involve beneficiaries.

Consultation

Expression

Understanding

The project is consistent with its environment and interacts positively with other stakeholders.

Cooperation

Respect

Complementarity

Project partners are involved to the greatest extent possible.

Choice

Results

Involvement

The project quality framework
The project reflects Handicap International's strategy and values. During the project design and implementation phases, verify that the project meets both Handicap International's mandate and the programme's strategy.

The project team and partners develop the skills necessary for implementing the project. Train project teams, and partners of necessity, on Handicap International approaches and skills.

Beneficiaries have the means to express their opinions (complaint mechanisms, satisfaction surveys). Encourage and empower beneficiaries (or their representatives) to express their level of satisfaction during the implementation phase.

The project contributes towards internal and external learning dynamics, and towards improving Handicap International's practices. Write up and share lessons learned on each project during project completion phase.

The project helps bring about long-term positive effects on the lives of beneficiaries and their families. Considerable the number and categories of beneficiaries at least once a year.

Any negative changes that might be brought about by the project environment, economy, conflicts... are avoided, mitigated or offset.

The project makes an intervention feasible (CRPD, Ottawa Treaty...), the project helps to prevent any form of distinction, exclusion or restriction, including those related to gender, disability, age, sexual orientation and/or cultural/political/geographic affiliation.

The project applies the ethical principles promoted by Handicap International. Conduct an analysis of needs, demands and resources in the initial diagnosis phase.

The project reflects Handicap International's strategy and values. Conduct a preliminary analysis of the capacity and structure of potential implementing partners during the design phase.

The project complies with international laws and the rules in force in the project's country, donor requirements, as well as Handicap International's own rules, standards and commitments.

The project helps to build the capacities of local stakeholders and to ensure their autonomy at the end of the project. Conduct a preliminary analysis of the capacity and structure of potential implementing partners during the design phase.

The project helps to reduce the vulnerability of targeted populations and to increase their response capacity. During the project design phase, and again during the project closure phase when there is a final evaluation, verify that the project contributes has contributed towards reducing the vulnerability of target populations.

The project helps to bring about long term positive effects on the lives of beneficiaries and their families. Define and manage project risks and assumptions.

The project provides an intervention that is seen to be harmful in any way.

The project team and partners develop the skills necessary for implementing the project. Train project teams, and partners of necessity, on Handicap International approaches and skills.

The project helps bring about long term positive effects on the lives of beneficiaries and their families. Contribute to the desired state of beneficiaries at least once a year.

Any negative changes that might be brought about by the project environment, economy, conflicts... are avoided, mitigated or offset.
